Front-End Developer

ABOUT

A passionate and enthusiastic front-end developer. I design and develop applications with the main focus on user experience. User can expect a modern looking UI with a fun animation to create even more impactful experience.

GOALS

I have built many solo projects. I want to experience developing an app as a team on a large scale project. My ultimate goal is to be a part of a team which create an innovative app which will leave a memorable impressions on user.

PROJECTS

The Archive

Jan 2022 - Feb 2022

Paid project

A showcase website for a luxurious fashion brand. Implement in an elegant theme of black and white. With smooth page transitions. Using firebase as the backend to store all products where users can sort by price or query by brands and categories. The showcase page takes advantage of pagination to lower the loads on the database.

[Vue.js](#) [Vite](#) [TypeScript](#) [Firestore](#) [FirebaseStorage](#)

Blockchain Visual

Dec 2021 - Jan 2022

Side project

A visualisation website for blockchain. You can see the building block of the blockchain and how are all the blocks chained together to create a secure and immutable distributed database.

[Vue.js](#) [Vite](#) [TypeScript](#)

Code340

Nov 2021 - Dec 2021

College project

A web platform prototype for an online marketplace for all kinds of code. An itemcode, voucher, giftcards. Register or login to post your product for sell or buy from other sellers.
